48	SAFETY & FACILITY AUDITS	Miles of Pipe	Direct Assignment	Direct Assignment	Non-Payroll Allocations

Basis for Determination of Cost Responsibility

Time Spent – Estimates of the portion of overall time spent on each Legal Entity are developed for each individual within the cost responsibility.

MMF – Using the Modified Massachusetts Formula, assets, payroll, and gross margin for each Legal Entity are equally weighted to establish allocation percentages for each Legal Entity.

Operational Assets – Time spent on each of the legal entities' operational assets.

Miles of Pipe – The miles of pipeline of each legal entity are combined to develop percentages for each legal entity.

Region Miles of Pipe – The miles of pipeline of each legal entity within a specific region are combined to develop percentages for each legal entity.

Non-Payroll Allocations - If non-payroll is not directly coded, a payroll weighted average allocation may be used. The payroll percentages described above are used to develop weighted average allocation percentages for each area of cost responsibility. Any non-payroll expenses may also be coded to a non-payroll company used for allocations in which case a mass allocation program refers to the weighted average percentages to allocate costs to legal entities.
