PART III: FOOTNOTES

Footnote Number	Text of the Footnote
1	Quantities reported represent allocated and billed dekatherms and do not represent system throughput. An individual quantity of gas may be reflected in multiple unbundled services prior to final delivery, for example, transmission, no notice balancing, interruptible park and lend, and interruptible wheeling. Thus the same quantity of gas may be reflected multiple times, so that the quantities by service class can not be added to determine total throughput.
2	Quantities and associated revenues reported include accruals and adjustments to previous service month actuals and prior period adjustments. Rate classes with minimal activity may have negative values reported as a result of these adjustments to actuals and prior period adjustments.
3	Additional charges imposed due to failure of customer to pay invoice on or before the due date. Recorded to Ferc Account 487 and reported in Ferc Account 495.
4	Provision for rate refund. Recorded to Ferc Account 496 and reported in Ferc Account 495.
5	Miscellaneous Service Revenue. Recorded to Ferc Account 488 but reported in Ferc Account 495.
