

WARNING

DO NOT use “CTRL-ALT-DEL” to reset your password

Using “CTRL-ALT-DEL” to reset your password or PIN remotely will lock you out of your PC which can only be resolved by physically coming to the office to fix the issue

Step 1: Connect to VPN

- If you need help connecting to VPN, [click here to access the VPN User Guide](#)

Step 2: Navigate to [Connect.FERC.gov](https://connect.ferc.gov)

- Select "Reset your Password"

Step 3: Enter your username and complete the prompt

A screenshot of the 'Get back into your account' prompt. It asks 'Who are you?' and instructs the user to recover their account by entering their email or username and the characters in the picture or audio below. There is a text input field for 'Email or Username' with an example: 'user@contoso.onmicrosoft.com or user@contoso.com'. Below this is a CAPTCHA image showing the letters 'H3W' and a speaker icon for audio. At the bottom, there is another text input field for the characters in the picture or words in the audio.

Step 4: Complete two-step verification (if required)

A screenshot of the 'verification step 1 > choose a new password' prompt. It asks the user to choose the contact method for verification. There are two radio button options: 'Text my mobile phone' (selected) and 'Call my mobile phone'. To the right, it explains that the user needs to enter their complete mobile phone number (with a masked number example) to receive a text message with a verification code. Below this is a text input field for 'Enter your phone number' and a 'Text' button.

Step 5: Create new password

- Password requirements
 - Minimum 12 characters in length
 - Must include uppercase letter, lowercase letter, number, and special character (#,\$,%, etc)

Step 6: Log out, then log back in

- Press the Windows key (⊞) + L to lock the computer, then log back in with your new password.

Step 7: Update your password on other devices and for Office accounts as needed
