

See Updates on the Sept. 8 New England Winter Gas-Electric Forum

FERC staff has issued a supplemental notice, featuring a preliminary agenda and attendee registration directions, for the September 8, 2022, New England Winter Gas-Electric Forum in Burlington, VT. The purpose of the forum is to bring together stakeholders in New England to discuss the challenges faced historically during New England winters and discuss the stakeholders' differing expectations of challenges for future winters.

FERC, NERC Encourage NAESB to Convene Gas-Electric Forum to Address Reliability Challenges

FERC Chairman Rich Glick and Jim Robb, President and CEO of the North American Electric Reliability Corporation (NERC), encouraged the North American Energy Standards Board (NAESB) to convene a forum to identify solutions to the reliability challenges facing the nation's natural gas system and bulk electric system as extreme weather continues to strain the nation's electric grid.

FERC Proposes to Modernize Accounting Systems to Reflect Changing Electricity Markets

The Commission's Notice of Proposed Rulemaking would modify its Uniform System of Accounts by creating new accounts for wind, solar and other non-hydro renewable assets. It also would establish a new functional class for energy storage accounts, codify the accounting treatment for renewable energy credits and create new accounts for computer hardware, software and communications equipment.

Commission Tackles Credit Risk Measures with NOPR, Show Cause Order

Requiring market operators to adopt tariff provisions that permit the sharing of credit-related information could improve the accuracy of credit exposure and risk assessments across multiple electric power markets, FERC says. The Commission also found that open access transmission tariffs in CAISO, ISO-NE, NYISO and SPP appear to be unjust and unreasonable because they lack certain credit risk management practices.
